In the processing plant, turkeys are often stunned with carbon dioxide or electricity, shackled by their legs and hung upside down. The turkeys' throats are slit on a circular blade before being placed in a scalding tank meant to loosen feathers. If turkeys are not properly stunned, they often miss the blade.

VIP Monthly Newsletter      October 2024

Before you purchase your Thanksgiving turkey, please consider this sentient animal on your table.

**Turkeys have many personality traits, including:**

**Curious** - Turkeys are inquisitive and enjoy exploring. They are always checking out interesting sights, sounds, and visitors.

**Intelligent** - Turkeys are highly intelligent and can effectively adapt to their surroundings.

**Playful** - Turkeys are playful individuals with unique personalities.

**Social** - Turkeys are extremely social and form strong social bonds. They love music and will sometimes dance and cluck along.

**Gentle** - Turkeys are gentle creatures that enjoy socializing with humans. They're also bonded to their young and will courageously defend their families against predators.

**Loyal** - Turkeys are incredibly loyal. Some turkeys will remember your face and sit closer to you each time you visit.

**Vocal** - Turkeys are highly vocal and the sound of the flock can indicate social tensions.

**Emotional** - You can tell a turkey's emotions by the color of their heads. The more intense the colors, the more intense their emotions.

**208.2 million turkeys were slaughtered in the U.S. in 2022**

Turkeys raised for human consumption are crowded into poorly ventilated industrial production facilities, sometimes with as many as 15,000 birds packed into a single factory building, followed by an agonizing transport to the slaughterhouse.

Please remember to buy only pasteur -raised eggs & to pass this email to your mailing list. Thank you! Lois
